

Table of Contents

Acknowledgments	iii
List of Figures	1
List of Tables	2
1: Introduction	3
2: Related Work	5
2.1 Time series	5
2.1.1 Inflation Time-Series Prediction	5
2.2 Hierarchical inflation Forecasting	6
2.3 Hierarchical Long Short-Term Memory Network	7
2.4 Hierarchical Attention Network	7
3: BiHRNN: Bi-Directional Hierarchical Recurrent Neural Network	9
3.1 Hierarchical Recurrent Neural Networks	9
3.1.1 Gated Recurrent Units (GRU)	10
3.1.2 HRNN	10
3.2 Bidirectional HRNN Model	12
3.2.1 Bidirectional Information Flow	13
3.2.2 Customized Loss Function	13
3.2.3 Hyperparameter Tuning	14
3.2.4 Fixed Constraints During Training	14
3.2.5 Summary	15
4: Dataset	17
4.1 The US Consumer Price Index	17
4.1.1 US CPI Hierarchy	18
4.2 Canada Consumer Price Index	18
4.2.1 Canada CPI Hierarchy	19

4.3	Norway Consumer Price Index	19
4.3.1	Norway CPI Hierarchy	19
4.4	Data Preparation	22
4.4.1	General Data Statistics	22
4.4.1.1	Data Augmentation	25
5:	Evaluation and Results	26
5.1	Baseline Models	26
5.2	Ablation Models	27
5.3	Evaluation Metrics	28
5.4	Results	28
5.4.1	US CPI Results	29
5.4.2	Canada CPI Results	29
5.4.3	Norway CPI Results	30
6:	Conclusion	33

Acknowledgments

I would like to express my deepest gratitude to my supervisor, Dr. Noam Koenigstein, for his invaluable guidance, support, and encouragement throughout this research. His expertise and insights have been instrumental in shaping the direction and outcomes of this work.
