

#### 4.2.1 *Canada CPI Hierarchy*

The CPI is organized into a seven-level hierarchy with 293 distinct nodes (indexes). At the top, Level 0 represents the headline CPI, an aggregated index of all components. Each index in the hierarchy is assigned a weight between 0 and 1, indicating its contribution to its parent CPI.

Level 1 consists of 10 (not including “All items excluding X” categories) main aggregate categories, or sectors: (1) “Food,” (2) “Shelter,” (3) “Household operations, furnishings and equipment,” (4) “Clothing and footwear,” (5) “Transportation,” (6) “Health and personal care,” (7) “Recreation, education and reading,” (8) “Alcoholic beverages, tobacco products and recreational cannabis,” (9) “Food and energy,” and (10) “Energy.”

Mid-levels (2-4) include more specific categories like “Meat” and “Women’s clothing.” The lower levels (5-6) feature more detailed indexes such as “Whole milk,” “Pasta mixes,” “Purchase of used passenger vehicles,” and “Roasted or ground coffee,” alongside others.

#### 4.3 *Norway Consumer Price Index*

The CPI in Norway is collected monthly by Statistics Norway<sup>5</sup>, primarily through electronic questionnaires sent to outlets on the 10th of each month, with responses due by the first working day after the 15th. In addition, electronic scanner data from grocery stores, pharmacies, clothing, sports retailers, and petrol stations are received monthly. The sample includes around 650 goods and services, selected based on household budget surveys and industry information, covering approximately 2,000 firms. For rent surveys, 2,500 tenants are sampled from the Rental Market Survey. Firms are chosen from the Business Register, with larger firms having a higher probability of selection based on turnover, after stratifying by industry and region.

##### 4.3.1 *Norway CPI Hierarchy*

The CPI is arranged in a three-level hierarchy with 52 distinct nodes (indexes). At the top, Level 0 represents the headline CPI, which aggregates all components. Each index in the hierarchy is given a weight between 0 and 1000, reflecting its contribution to the overall CPI.

Level 1 is made up of 12 main aggregate categories, or sectors: (1) “Food and non-alcoholic beverages,” (2) “Alcoholic beverages and tobacco,” (3) “Clothing and footwear,” (4) “Housing, water, electricity, gas and other fuels,” (5) “Furnishings, household equipment and routine maintenance,” (6) “Health,” (7) “Transport,” (8) “Communications,” (9) “Recreation and culture,” (10) “Education,” (11) “Restaurants and hotels,” and (12) “Miscellaneous goods and services.”

Level 2 includes more specific categories like “Footwear” and “Clothing.”
